ABSTRACT

A wearing article (4 to 4D) includes a main body (5 to 5D) having a front part (P), a back part (Q) and a crotch part (R) coupling the front part (P) and the back part (Q). The main body (5A to 5D) includes a pair of waist edges (T) opposed to each other and a pair of leg edges (S) opposed to each other. A shirring (15) is so formed in a substantially widthwise middle portion of the crotch part (R) of the main body (5 to 5D) as to shorten a space between the front part (P) and the back part (Q). A ratio of the length (L1) of the crotch part (R) along the forward and backward direction (X) to a length (L2) between the pair of waist edges (T) is 1:15 to 1:2.
